KeepRite®

Timely registration required.
See warranty certificate for details.

KeepRite® air conditioners come with the newest cooling technology and quality components to give you the ultimate in climate control. You get outstanding quiet, maximum energy cost savings, and exceptional warranties to assure you of long-lasting satisfaction.

Keep the comfort coming.

KeepRite® SXT+ Two-Stage Air Conditioners featuring the Observer™ communicating system are designed to take your home to a new level of comfort and efficiency.

Teamed with our Observer communicating wall control and a KeepRite communicating fan coil or gas furnace, the SXT+ functions as part of a complete communicating home comfort system. Various components of the system “talk” to each other electronically, fine-tuning comfort levels while maximizing energy savings.

Quiet in the house.

We build the SXT+ with premium components for quiet performance.

The two-stage scroll compressor with a deluxe sound blanket is at the heart of this cooling machine. A variable-speed fan motor that operates primarily on quieter, lower speeds is another premium feature (CCA9 models only). And operating sound is further minimized by advanced aerodynamic fan and air discharge systems. Plus, the SXT+ typically runs at the lower stage, switching to higher operating levels as necessary to provide steady cooling when outdoor temperatures increase. Custom-matched with a KeepRite variable-speed communicating fan coil or gas furnace, this two-stage operation delivers whisper-quiet operating sound levels and superior humidity control season after season. As part of a complete system, the SXT+ adjusts heating and cooling levels to match the needs of your home for a consistently comfortable flow of conditioned air.

Add up the savings.

High efficiency saves money.

Achieving energy efficiency ratings as high as 19 SEER[‡], these are our most efficient air conditioners ever.▼ You could save up to 47% compared to an older 10 SEER unit!

[‡]SEER stands for Seasonal Energy Efficiency Ratio.

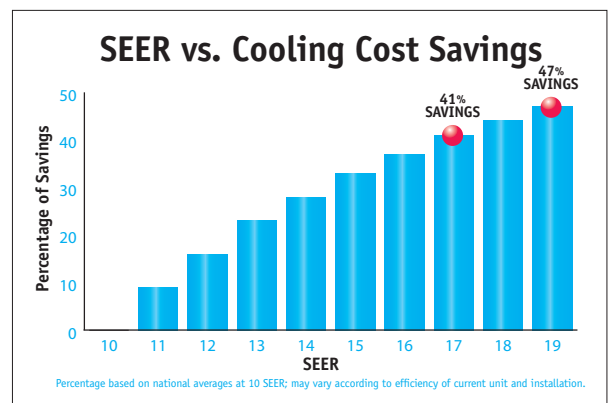

▼19 SEER rating for CCA9 models when paired with select indoor equipment.

We keep our word.

We've added our No Hassle Replacement™ limited warranty to give you extra security.

KeepRite units are backed by exceptional warranties, including our No Hassle Replacement™ limited warranty, which gives the original purchaser a one-time replacement unit if the compressor or outdoor coil should fail due to defect within the first ten years. You also get a 10 year parts limited warranty upon timely registration.*

*Limited warranty period is 5 years for parts if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. Please see warranty certificate for further details and restrictions.

SXT+ TWO-STAGE AIR CONDITIONERS

FEATURING THE OBSERVER™ COMMUNICATING SYSTEM

1. Quiet

The two-stage scroll compressor operates most of the time at the quieter, lower stage, changing over to the higher stage with warmer outdoor temperatures to produce more cool air. A deluxe sound blanket also reduces compressor sound levels.

2. Durable

The painted, galvanized steel cabinet features a powder-coat, baked-on finish over galvanized steel with narrower spacing to provide maximum protection as it allows for proper airflow and easy coil cleaning.

3. Efficient

The scroll compressor and the 7 mm copper tubing with aluminum fin coils work collectively to save on energy.

4. Smooth Operation

The variable-speed fan motor (CCA9 models only) operates most of the time at quieter, lower speed. Aerodynamic air discharge design reduces operating sounds.

Observer™ Communicating Wall Control

The SXT+ can be teamed with our innovative Observer communicating wall control, offering full-color touchscreen technology and coordinating with KeepRite communicating gas furnaces and air conditioners to create maximum efficiency and ideal comfort.

Keep warm, keep cool with KeepRite systems.

A completely integrated system of KeepRite heating and cooling products can maximize comfort and efficiency.

- a. Air Cleaner** filters out many indoor air pollutants so the air in your home is cleaner.
- b. Full-Color Touchscreen Observer™ Communicating Wall Control** allows you to customize heating and cooling levels and can also save energy.
- c. Humidifier** enhances comfort by reducing dryness in the air.
- d. Communicating Gas Furnace** for maximum comfort and efficiency; seamlessly integrates with Observer communicating wall control to create ideal warmth and energy savings.
- e. Communicating Air Conditioner** integrates seamlessly with Observer communicating wall control and communicating gas furnace to optimize comfort and energy-saving operation.
- f. Evaporator/Indoor Coil** matches your KeepRite air conditioner and furnace to ensure great performance.
- g. UV Lights** help prevent the growth of microbes on the coils. (Not available on all models.)

The best choice for your home.

† Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit www.energystar.gov.

♦ For information regarding furnace or fan coil options that can increase the energy efficiency of selected 13 and 14 SEER KeepRite air conditioners (SEER) and heat pumps (SEER and HSPF), go to Comortmaker.com and look for "Energy Savings" on the menu.

‡ Timely registration required for 10 year parts limited warranty. Limited warranty period is 5 years for parts if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. Please see warranty certificate for further details and restrictions.

† 16 SEER rating when paired with select indoor equipment.
