Test Address

Oakbank, MB
R0E 1J2

Test Location

Basement

Test Dates

02/19/2019 - 05/24/2019

Date Received by Lab

05/31/2019

Notes

A copy of this report was emailed to cremarchuk@hotmail.com.

The EPA recommends testing your home or business every 2 years for radon. The EPA's recommended action level is 4.0 pCi/L and the World Health Organizations (WHO) recommended action level is 2.7 pCi/L. Your test result was 4.6 pCi/L and falls below the EPA recommended action levels. Outside of the United States of America, units of measurement call Becquerel are used. Your result is equal to 170 Bq/m³.
