HEIL
HEATING & COOLING PRODUCTS®

The Strength Behind The Brand

Choosing a Heil® furnace means more than just selecting a brand. It means selecting a product backed with tremendous assets in design engineering, quality manufacturing, and service support—as well as a

100-year tradition of excellence. We're dedicated to bringing you home comfort products that meet and exceed your expectations for high quality, energy efficiency, and reliability. You can depend on us.

The Power Of Communication

The Heil® QuietComfort® ET 96 Variable-Speed Two-Stage Gas Furnace featuring the Observer™ communicating system is designed to take your home to a new level of comfort and efficiency. Teamed with our Observer communicating wall control and the appropriate air conditioner and indoor coil, the QuietComfort ET 96 functions as part of a complete communicating home comfort system. Various components of the system “talk” to each other electronically, fine-tuning comfort levels while maximizing energy savings.

Taking Comfort To Another Level

Unlike single-stage furnaces—which often heat up fast and shut down fast, creating noticeable swings in temperature—the QuietComfort ET 96 delivers consistent heat and overall comfort. The two-stage heat system operates at the lower, primary heating stage most of the time and automatically adjusts to the higher, full capacity stage if temperatures drop. The variable-speed

blower motor can also help increase comfort by maximizing moisture removal¹ during cooling (air conditioner) operation. And the high efficiency blower motor can be run continuously to improve indoor air quality.

¹Used with a humidity-sensing thermostat or dehumidistat.

Built Quiet

The sturdy steel cabinet is thermal lined and insulated to reduce the amount of heat and operating noise that escapes. A sealed blower

compartment, soft-mount components, and the variable-speed blower motor also reduce operating sounds. When matched with select Heil air conditioners and evaporator coils, the ECM variable-speed blower motor can also boost cooling efficiency for increased SEER[†] rating.[§]

[†]SEER stands for Seasonal Energy Efficiency Ratio.

[§]As compared to the Air-Conditioning, Heating and Refrigeration Institute's standard coil-only rating.

Great Products, Great Warranties

Heil units are backed by exceptional warranties, including our No Hassle Replacement™ limited warranty, which gives the original purchaser a replacement unit if the heat exchanger should fail due to defect within the first ten years. Upon timely registration, you also get a 10 year parts limited warranty and a lifetime limited warranty on the heat exchanger.*

*Limited warranty period is 5 years for parts and 20 years for heat exchanger if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. Please see warranty certificate for further details and restrictions.

The Heart Of Dependability

The heart of every furnace is the heat exchanger. The proven RPJ® (Rigid Press Joint) heat exchanger is designed to move more heat to the outside surface for increased heat transfer. The weld-free interlocking clamshell design reduces cracking or separating over the life of the gas furnace. The RPJ heat exchanger plays a significant role in boosting this model's efficiency to a 96% AFUE[‡] rating. So you can count on energy savings, especially compared to an older, less efficient furnace.

[‡]AFUE stands for Annual Fuel Utilization Efficiency.

Higher AFUE Equals Greater Energy Savings

Percentage based on national averages; may vary according to efficiency of current unit and installation.

YEAR-ROUND COMFORT

A completely integrated system of Heil heating and cooling products can maximize comfort and efficiency.

- Air Cleaner** filters out many indoor air pollutants so the air in your home is cleaner.
- Full-Color Touchscreen Observer™ Communicating Wall Control** allows you to customize heating and cooling levels and can also save energy.
- Humidifier** enhances comfort by reducing dryness in the air.

ENERGY STAR

INNOVATIONS THAT ENHANCE YOUR COMFORT

- 1 Reliable**
Direct hot surface ignition system features an advanced silicon nitride igniter and in-shot burners for greater reliability.
- 2 Safe**
Temperature limit control, reliable gas valve and induced draft motor all help ensure safe operation.
- 3 Quiet**
Solid pre-painted steel insulated cabinet with tight-fit door latch system, blower motor isolated behind a sealed door, and soft-mount rubber gaskets on key components lower operating sounds.
- 4 Efficiency**
ECM variable-speed blower motor provides efficiency. The QuietComfort ET 96 is also compatible with two-stage cooling, and its advanced dehumidification capability can reduce additional moisture in the air when paired with an air conditioner or heat pump and a humidity-sensing thermostat.
- 5 System Control**
State-of-the-art electronic controls monitor system operation and allow for faster, easier system diagnostics.

- d. **Compatible Communicating Gas Furnace** for maximum comfort and efficiency; seamlessly integrates with Observer communicating wall control to create ideal warmth and energy savings.
- e. **Compatible Communicating Air Conditioner** integrates seamlessly with Observer communicating wall control to optimize cool comfort and energy-saving operation.
- f. **Evaporator/Indoor Coil** matches your Heil air conditioner and furnace to ensure great performance.
- g. **UV Lights** help prevent the growth of microbes on the coils. (Not available on all models.)

Observer™ Communicating Wall Control

The QuietComfort ET 96 is teamed with our innovative Observer communicating wall control, offering full-color touchscreen technology and coordinating with compatible air conditioners and system accessories to create maximum efficiency and ideal comfort.
